

SAGAN Life®

5 Gallon

JUG FILTER SYSTEM

Now you can fill your 5 gallon water jug from the convenience of your home and drink purified, great tasting water. No more trips to the store to fill your water jugs every few days. Save time and hundreds of dollars each year by purifying water at home with the Sagan Life® 5 Gallon Jug Filter System!

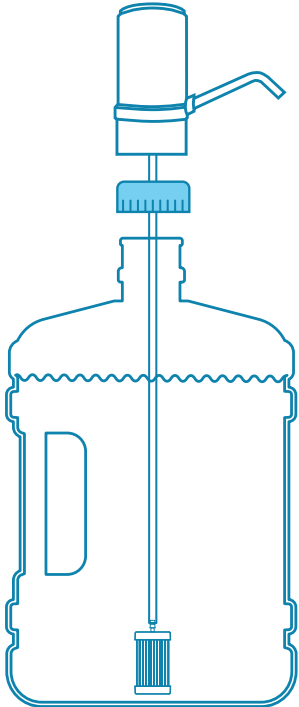

The Sagan Life® Journey™ Filter has been independently tested and certified to purify up to 250 gallons.

5 Gallon

JUG FILTER SYSTEM

Great tasting, purified water

USE INSTRUCTIONS

1. Charge the Power Plus Pump as directed.
2. After assembly of the components on the Water Jug as shown at left, press the power button on the top of the Power Plus Pump to start the flow of purified water.
NOTE: The blue donut cap will not screw onto the jug, but just sits on top.
3. Press button again to stop the pump.

SAGAN LIFE® JOURNEY™ FILTER

Effective, Safe Water Filtration

The patented filtration media technology used in all Sagan Life® water purification products is based on electroadsorption of contaminants, not mechanical filtration. The electro-positively charged media acts like a magnet attracting and retaining contaminants as small as viruses out of the water as they come in contact with the media.

The filter reduces heavy metals and other chemicals found in water supplies, such as: Chlorine, Chromium, Lead, Mercury, Arsenic, and Zinc.
